

Pakistan

World CME QA & CPD Program

The Pakistan QA&CPD Program uses the latest in interactive multimedia education complemented by video and animation of procedures. Additional resources, such as 'print out' patient information, are also provided. Each annual volume covers new topics and the first annual program focuses on population health and a revision of the basics.

An intensive Quality Assurance & CME/CPD program, accredited at the highest world standards, with quarterly self assessment and formal annual exam awarding a Certificate of Satisfactory Completion.

Read on for more information and details on how to enrol.

The program carries medi+WORLD International, World CME and MMU accreditation.

World CME - Pakistan is the result of a collaboration between World CME publishers and accredited providers of international medical education, and family physicians and medical educators in Pakistan, who will review the education for local relevance.

Our Pakistan Liaison Officer, Dr Sohail Qidwai is a practising family doctor in Karachi and he is coordinating the program. Contact details can be found on the CD cover or at: <http://www.worldcme.com/pakistan.htm>

Each annual program provides quarterly case-based CME modules and a self test. At completion of the fourth and final module there is an annual test with 'print out' result sheet. On successful completion of that test, (a 75% pass mark is required) a Certificate of satisfactory completion will be forwarded to participating doctors. Participants may sit the test as many times as they wish however.

Each CD based program comes with a suite of resources, related to the case based topics. These include charts, tables and (interactive) video or animation of medical procedures.

Program 1 concentrates on Population health plus review of the basics and consequent programs will deal with a range of clinical topics until all topics have been reviewed.

We welcome your comments and feedback; and this can be sent to the Publisher or the Pakistan Liaison Officer, contact details are listed on the inside CD cover.

We hope you find these programs useful in the care of your patients and we hope to work with you to provide the most valuable and useful program possible.

Dr Sohail Qidwai

Pakistan Liaison Officer
